WELCOME MESSAGE

Welcome message from the congress chair and president of the South African Renal Society

This is to welcome all our delegates to the vibrant economic hub of Southern Africa, the city of Johannesburg. Many of you should be pleasantly surprised at the first world facilities that are available, showcasing the positive future of our diverse and wonderful country.

During our congress we will present talks and research covering a broad spectrum of up to date nephrology topics from local and international experts, some of whom are expatriates, and we will highlight research achievements from our local colleagues. For the first time we will have a full 2 day CME preceding the congress itself, during which we will provide interesting talks for our younger and more senior colleagues alike.

We trust you will enjoy the entertainment facilities that are available at our venue, as well as a stone's throw away via the Gautrain. Of course, these are best enjoyed after maximizing your attendance at the congress talks!

I would like to thank all involved in arranging our congress, in particular our sponsors, Turners conferences, and our organizing committee.

Yours sincerely,

Prof Graham Paget

Congress Chair, President: South African Renal Society

WELCOME MESSAGE

Welcome message from the President of the Renal Care Society of South Africa

A warm welcome; members of the Renal Care Society of South Africa, invited speakers, honoured delegates to congress 2018, Johannesburg; South Africa. Our combined local organizing committee has been hard at work since the beginning of the year putting together a program that is scholarly as well as relevant to our congress theme "Sustainable Kidney Care for low- and Middle-Income countries". Based on the theme of this congress, it means us as nephrology practitioners are faced with sustaining kidney care under the financial constraints we are facing. Kidney care in most of the countries, especially in the African continent is still a dream. Most of the African countries are still finding it difficult to keep the pace with the rising kidney pathologies, let alone providing renal replacement therapies.

It is against this backdrop that we have come with this theme so as to apply our minds about how we can sustain kidney care under these circumstances. The rising cost of the equipment, the low number of available kidneys for transplantation makes this mission impossible. The type of residence and the water scarcity makes it hard even to think about peritoneal dialysis. This leaves us with only one option which is to raise awareness regarding healthy life style which will help to achieve our theme.

Based on the above information it is my duty to acknowledge every practitioner present here today and pass my gratitude to all those who could not make it here today caring for the clients. Thanks to the tenacity of our past president and current deputy president, Mark Padavattan, the RCSSA executive committee as well as the local organizing committee, the Allied Health Professionals for making time to be here. Aside from increasing the Society's footprint and visibility in our field through networking with other likeminded organisations and legislative bodies, we are also inviting other Allied Health Professionals to share with us their approach in sustaining kidney care. Now let me say, once more you are mostly welcomed and please enjoy the hospitality of our city of gold. Local organizing committee has prepared as always, the best and mind enriching presentations. We are grateful to the South African Renal Society for their guidance as well as the Medical industry for their support over the years. A warm spring welcome to delegates. I trust you will enjoy our interactive workshop and an invigorating scientific program.

Dr David Mphuthi

President: Renal Care Society of South Africa

CONGRESS INFORMATION

REGISTRATION

Registration desk location:

Outside Senate II

Thursday 11 October: 09h00 – 10h00

Registration desk location:

Outside the exhibition hall - Assembly I & II

Friday 12 October: 07h30 – 19h30

Saturday 13 October: 07h30 – 17h00

Sunday 14 October: 08h00 – 12h00

SPEAKER PREPARATION CENTRE INFORMATION

Speaker Preparation room location:

Assembly IV

Friday 12 October: 07h30 – 19h30

Saturday 13 October: 07h30 – 17h00

Sunday 14 October: 08h00 – 11h00

A speaker preview room is available onsite and will be located in Assembly IV. Every speaker is required to check in at the speaker preview room to upload and run through their presentation with a technician. The technicians will then ensure that your presentation is available in the meeting room at the correct time.

Please visit the speaker preview room the day before your scheduled presentation where possible. We are aware that it is not always possible to upload your presentation the day before however we would appreciate it if you could load your presentation at least 2 hours prior to your presentation time.

POSTER INFORMATION

Poster Area Sponsored by Shire Pharmaceuticals

Printed posters will be displayed in Assembly I & II. Posters may go up from 08h00 on Friday 12th of October and must be removed by 10h15 on Sunday 14th of October. Posters left up after this time will be discarded.

WIFI INFORMATION

The WiFi name is Emperors Palace and it doesn't require a password.

CATERING INFORMATION

Tea / coffee and lunch will be served in the exhibition hall – Assembly I & II. The times of these can be found in the programme.

CONGRESS PHOTOS

Please share your congress photos. You may email the photos to info@turnersconferences.co.za

PARKING INFORMATION

Parking is complimentary for delegates attending the conference. Please state at the gate that you are attending the SA Renal conference and you will be provided with a parking voucher which you will have to return when exiting the gate.

SOCIAL EVENTS

Welcome Reception

Date: 12 October 2018

Venue: Exhibition Hall – Assembly I & II

Time: 19h30 – 21h00

AIRPORT SHUTTLE TRANSFERS

The Emperors Palace Shuttle service is a complimentary service offered to all guests travelling between O.R. Tambo International Airport and Emperors Palace. The Shuttle runs every 20 minutes from 06h00 and 23h00.

An Early Shuttle is also available on request, at 30 minute intervals from 04h00 to 06h00. If you require a shuttle between the hours of 23h00 and 04h00 please contact the hotel Reception for further assistance.

LOST AND FOUND

For information about lost and found property, please visit at the registration desk.

JaLo

JaLo ENTERPRISE

MAKING A DIFFERENCE

"tap to drain"

About Us

JaLo Enterprise is owned and operated by the founders Ms. Loraine Kunene and Mrs. Jackie Pretorius. The Company is **100% Black, Female** owned and has a **B-BBE Status Level 1**.

The Business focuses on the supply of Medical products including Dialysis products; Dialysis equipment and consumables; Water Purification Units and related filters and chemicals, including Services and Technical Support to both private and public sector.

One of the key success factors of the company is the strong skills and expertise in the renal field and the company is well positioned to address programs where skills transfer is required.

Services

JaLo Enterprise offers expertise in:

- . Layout, Installation and Commissioning of Renal Water Treatment Plants
- . Installation, Service and Maintenance of Renal Equipments
- . Technical Training and Certification
- . Application and Clinical Training

Products

Our comprehensive product range includes:

- . Water Treatment Systems
- . Dialysis Machines
- . Dialysis Chairs
- . Dressing Packs
- . Hemodialysis Consumables
- . Peritoneal Dialysis Consumables
- . Disinfectants and Sterilants

Accreditation

- . Member of **SAMED**
- . CE Mark
- . ISO 13485
- . GMP
- . Radiation Control Licence

INTERNATIONAL SPEAKER BIOGRAPHIES

FATIU ABIOLA AROGUNDADE

Professor Fatiu Abiola Arogundade had his basic medical degree from the College of Medicine, University of Lagos and postgraduate training in Obafemi Awolowo University Teaching Hospitals Complex, Ile-Ife. He has the Fellowship of National Postgraduate Medical College of Nigeria in Internal Medicine (FMCP), West African College of Physicians (FWACP), Royal College of Physicians of Edinburgh (FRCPEdin) and Royal College of Physicians of London (FRCP). He had ISN Fellowship training in Cairo University Hospital, Egypt, hence he is an ISN Fellow since 2002. Professor Arogundade was promoted to the rank of Professor of Medicine on the 1st October 2011 in Obafemi Awolowo University and he is also a Honorary Consultant Physician / Nephrologist to the Obafemi Awolowo University Teaching Hospitals Complex, Ile-Ife, Nigeria.

His research interests are in general nephrology and renal replacement therapies. He had studied aetiopathogenesis and epidemiology of CKD in Nigeria looking at contributions of HIV, Hydrocarbons, Sickle Cell Disease and parasites. He had studied anaemia, bone disease, survival and quality of life in advanced chronic kidney disease. He was in the pioneer group that assessed the usefulness and applicability of CAPD in Nigeria as well as renal transplantation. He is currently examining modalities for retarding progression of kidney disease in Sickle Cell Disease patients as well as genomics of kidney disease in Africa. He has published about 80 manuscripts in local, national and international journals and is a reviewer to several local and international journals. He is the Editor in Chief of Journal of Clinical Sciences and an editorial adviser to Tropical Journal of Nephrology. He has authored 4 chapters in 4 different books including Comprehensive Clinical Nephrology.

He has also been involved in administration as he served as the Vice-Dean, Faculty of Clinical Sciences, Obafemi Awolowo University between 2011 and 2013. He is the Secretary to Faculty of Internal Medicine, National Postgraduate Medical College of Nigeria from 2011 to 2014 and now the Chairman of the Faculty. He is the current Secretary and Treasurer to African Association of Nephrology and President-Elect of Nigerian Association of Nephrology and Transplant Association of Nigeria. He has mentored about 30 postgraduate students. He is married with children and his hobbies include travelling, sports and reading.

FERGUS CASKEY

Dr Fergus Caskey is the Medical Director of the UK Renal Registry.

Having graduated from the University of Glasgow, Fergus went on to obtain a Masters in Health Services and Public Health Research and then an MD in the Cost-effectiveness of Dialysis in Europe from the University of Aberdeen. He became a Consultant Nephrologist in Bristol and was appointed Medical Director of the UK Renal Registry in 2013.

Through his work at the UK Renal Registry he has broad experience and access to expertise in datasets, databases, data extraction, information governance, research ethics and the planning of analyses for audit, quality improvement and research. His research interests include the epidemiology of acute kidney injury and all stages of chronic kidney disease, particularly around equity of access to treatment and using routine healthcare data to improve the efficiency of clinical trials.

FRANK BRENNAN

Dr Frank Brennan is a Palliative Care Physician based in Sydney, Australia. He works within the Department of Nephrology at St George Hospital in a Renal Supportive Care Service. He has an interest in all aspects of this area including symptom management, advance care planning and the care of patients with ESKD who are not receiving dialysis. He is also a lawyer and has written extensively on the human rights dimensions of pain management and Palliative Care. Some years ago, he worked as a junior doctor in Livingstone Hospital, Port Elizabeth.

INTERNATIONAL SPEAKER BIOGRAPHIES

IVOR KATZ

Professor Ivor Katz is a senior staff specialist and nephrologist at St George Hospital Renal Department in Sydney and a conjoint Associate Professor at the University of UNSW.

His research interests and PhD were and remain in public health and chronic kidney disease (CKD). He has a particular interest in detecting people with high risk kidney and cardiovascular disease (CVD) and then linking specialists with primary care clinicians for the management of these diseases.

Professor Katz moved to Australia in 2009 following 20 years of experience in South Africa as a clinical research academic and teacher at Chris Hani Baragwanath Hospital which is part of the University of the Witwatersand's Medical School campus in Soweto. He was the Head of the Department of Renal Medicine at this hospital from 1996 to 2009 before taking up a new position in Sydney. He completed a PhD at WITS School of Public Health in 2010 which reflects his strong interest in Public Health.

His research and interest focuses have been on Health Systems and Management of Chronic Disease and in particular Chronic Kidney Disease. He remains particularly interested in developing and adapting unique models of care and web-based technologies.

He currently participates on the Primary Care Education Advisory committee for Kidney (PEAK) disease which is part of the Kidney Health Australia initiative to educate primary care clinicians and advise on early detection and management of CKD. He is also a member of the Chronic Disease Integrated Care Group working through the St George Hospital with community organisations and GPs.

THOMAS MUELLER

Dr. Mueller works as a Professor at the Clinic of Nephrology at the University Spital in Zürich, Switzerland. He received his medical degree from the Philipps-University of Marburg in Germany. His postgraduate training included residencies in Internal Medicine, Intensive Care, and Nephrology at the Clinic of Medicine at the Philipps-University of Marburg and also a research fellowship at the Institute of Medical Chemistry at Karl-Franzens University in Graz, Austria. Dr. Mueller spent three years as a Postdoc at the Division of Nephrology, Brigham and Women's Hospital, Harvard Medical School, Boston, MA. From 2004 to 2013 Dr. Mueller had a clinical appointment as Associate Professor in the Division of Nephrology and Immunology at the University of Alberta, Edmonton, Canada. During this time he was a principal investigator in the largest trial on the value of microarray technology for diagnostics in renal transplantation. Clinically he was responsible for the living donor transplant program at the University of Alberta and strongly involved in the national kidney paired donation program.

Currently he works as Lead Attending in the Clinic of Nephrology. In this position he is Head of the outpatient clinics and Medical director of the renal transplant program. His research has included applications of routine immune monitoring, anti-inflammatory potential of folates (international patent), web-based support of clinicians, identification of early outcome markers for kidney transplantation and biomarkers for organ injury.

INTERNATIONAL SPEAKER BIOGRAPHIES

VALERIE LUYCKX

Dr Luyckx obtained her MBBCh degree in medicine at the University of the Witwatersrand, South Africa. She trained in Internal Medicine at the Jackson Memorial Hospital, University of Miami and in Nephrology at the Brigham and Womens' and Massachussetts General Hospitals, Harvard University, USA. She has worked as a consultant physician in Internal Medicine and Nephrology in teaching hospitals in South Africa, USA, Canada and Switzerland. She holds an MSc in Public Health in Developing Countries from the London School of Hygiene and Tropical Medicine with a focus on Ethics and Health Systems. Her main clinical interests are acute kidney injury, progression of chronic kidney disease and hemodialysis. Her research activities include developmental programming of hypertension and kidney disease, traditional medicine use and kidney disease, and the challenges of justice and equity relating to resource allocation and management of kidney disease in resource limited regions. She is currently a member of the Executive Committee of the International Society of Nephrology with a strong focus on advocacy. She is consultant to the Global Health Ethics Unit at the World Health Organization.

VIJAYA RAJKUMARI

Dr Vijaya Rakakumari is a senior consultant surgeon (Vascular Access, Laparoscopy and Kidney Transplantation) at the Apollo Hospital in New Delhi, India. (India's largest corporate hospital and the 1st JCI accredited). She is also a teacher in Laparoscopic Surgery at the Ethicon-IAGES Centre, Delhi and a Post Graduate teacher for MRCS pre-exam courses for The Royal College of Surgeons, UK in India.

Her qualifications include:

- MBBS (1986-91) - University of Madras, Chengalpattu Medical College, India, MS Surgery (1993-96)
- Christian Medical College, Vellore, India, DNB (1998)
- Diplomate of National Board of examinations, FRCS (2000)
- The Royal College of Surgeons, Edinburgh, U.K, IDCCM
- Diploma in critical care medicine, ISCCM, Fellowship 2006
- Fellowship in multiorgan retrieval and transplantation

Clinical Experience; Largest experience in laparoscopic donor nephrectomise in India. She has vast experience in handling high risk transplants and post-transplant issues due to the critical care medicine training and has had the privilege to have done the India's youngest and oldest renal transplant and maximum paired kidney donations.

As a member of the Infection Control Committee she ongoingly trains the medical staff and has conducted various ACLS and BTLs courses as national faculty in India.

INTERNATIONAL SPEAKER BIOGRAPHIES

VIVEKANAND JHA

Professor Vivekanand Jha is the Executive Director at The George Institute for Global Health, India, and a James Martin Fellow at The George Institute for Global Health, University of Oxford, and the President-Elect of the International Society of Nephrology.

Vivek did his Internal Medicine and Nephrology training at PGIMER (Postgraduate Institute of Medical Education and Research) in Chandigarh, India, joined its faculty and was the Professor of Nephrology. He set up a basic science research lab including the Stem Cell Research Facility and was Head of the Department of Translational and Regenerative Medicine and Officer-In-Charge, Medical Education and Research Cell.

Prof Jha is recognized as a global expert on kidney disease and focuses on emerging public health threats globally and in India. He currently leads research projects operating in more than 20 countries. He is particularly interested in using multi-disciplinary approaches and innovations to address the system level health and economic challenge posed to humanity by non-communicable diseases. He enjoys teaching and mentoring young colleagues.

He has published over 280 peer reviewed papers, many in the most prestigious journal in the world and over 40 book chapters. He is frequently invited to lecture at major international conferences. He has held leadership positions in many organizations, is a member of Task Forces and Scientific Advisory Committees of the Department of Science and Technology of Govt of India, an Advisor to the WHO, has been on Editorial Boards of major journals and has been Section Editor of The Oxford Textbook of Clinical Nephrology.

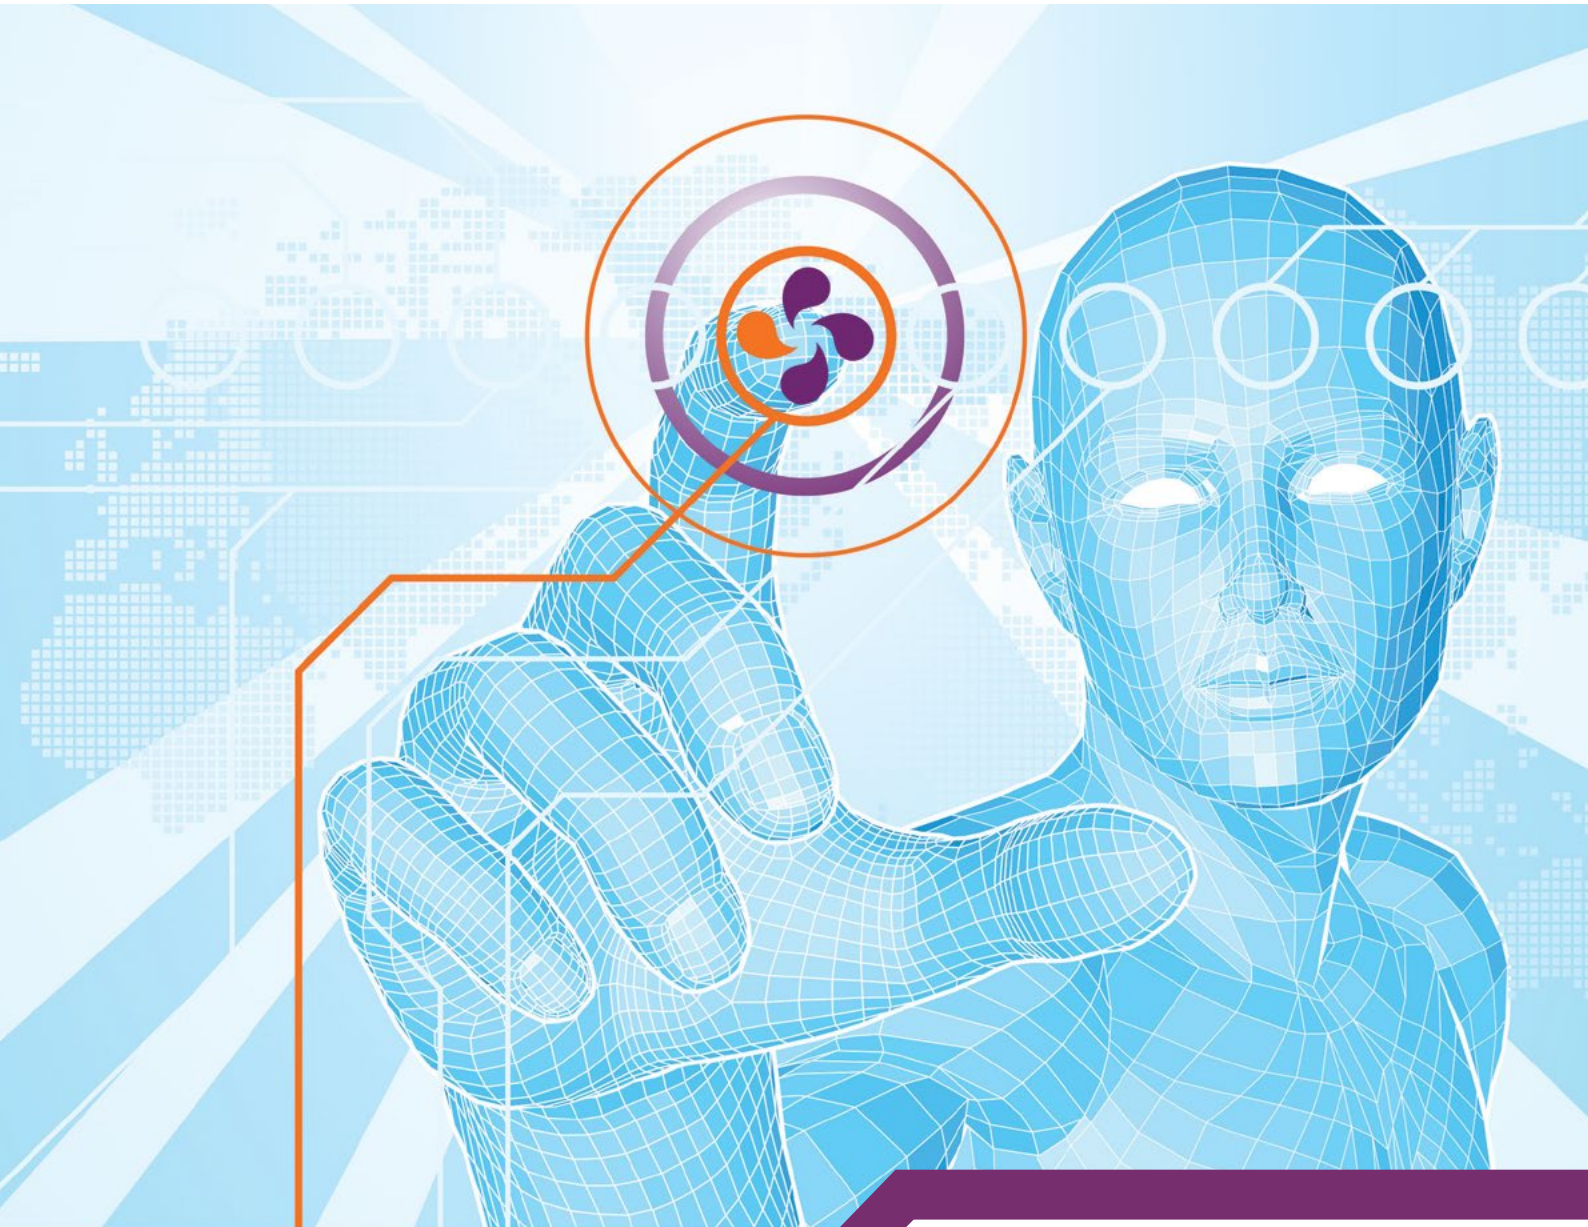

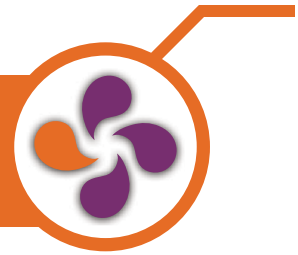

YANELLA MARTINEZ-SMITH

Yanella Martinez-Smith is a Renal Vascular Access Clinical Nurse Consultant at St. George Hospital in Australia. Yanella has been a registered nurse since 1997 and completed her Masters of Nursing (advance practice) in 2006. Yanella's renal experience has been across all aspects of renal care mainly at St George, but she has also worked in the Northern Territory of Australia and the UK. The renal service at St George is one of the largest units in Australia consisting of 220 in-centre and satellite haemodialysis patients, 40 home haemodialysis and a growing predialysis population who requiring vascular access management. In 2006, Yanella was appointed the vascular access nurse role. This role is very diverse and autonomous which includes running an outpatient vascular access clinic, referring and coordinating patients to the vascular surgeons for creation of vascular access, managing and referring access issues amongst the multidisciplinary team and largely educating and supporting staff and patients on access care. Yanella achieves great satisfaction in her role through improving patient vascular access outcomes.

MIRCERA® - Unique Mode of action From start to stability¹

MIRCERA®
methoxy polyethylene glycol-epoetin beta

Reference:

1. Klinger M, Arias M, et al. Efficacy of intravenous methoxy polyethylene glycol-epoetin beta administered every 2 weeks compared with epoetin administered 3 times weekly in patients treated by hemodialysis or peritoneal dialysis: A randomized trial. *Am J Kid Dis* 2007;50(6):989-1000.

[54] MIRCERA® 30 µg/0,3 mL - 43/8.3/0941; MIRCERA® 50 µg/0,3 mL - 42/8.3/0480; MIRCERA® 75 µg/0,3 mL - 42/8.3/0481; MIRCERA® 100 µg/0,3 mL - 42/8.3/0482; MIRCERA® 120 µg/0,3 mL - 43/8.3/0942; MIRCERA® 150 µg/0,3 mL - 42/8.3/0483; MIRCERA® 200 µg/0,3 mL - 42/8.3/0484; MIRCERA® 250 µg/0,3 mL - 42/8.3/0485; MIRCERA® 360 µg/0,6 mL - 43/8.3/0943. Each prefilled syringe contains 30 µg, 50 µg, 75 µg, 100 µg, 120 µg, 150 µg, 200 µg, 250 µg or 360 µg methoxy polyethylene glycol-epoetin beta. Abbreviated product information. For full prescribing information refer to the package insert approved by the medicine regulatory authority.

PROGRAMME - THURSDAY, 11 OCTOBER 2018

09:00 – 10:00	Tea / Coffee Break – Senate II Foyer
	Adult CME Day I Venue: Senate II
	Session 1: Various
	<i>Chairperson: Dr Matey Radev</i>
10:00 – 10:30	Cardio-Renal Syndrome Malcolm Davies (SA)
10:30 – 11:00	Multiple organ support in the critically ill patient Gloria Teckie (SA)
11:00 – 11:30	Post-transplant immunology, chronic antibody mediated rejection Malcolm Davies (SA)
11:30 – 11:45	Tea / Coffee Break – Senate II Foyer
11:45 – 12:15	Intradialytic hypotension syndrome Brian Rayner (SA)
12:15 – 13:15	PD pearls - an update on what is new in PD Brett Cullis (SA)
13:15 – 14:00	Lunch Break – Galleria
	Session 2: Chronic Kidney Disease
	<i>Chairperson: Dr Malcolm Davies</i>
14:00 – 14:30	CKD prevention strategies & how to tackle CKD progression Ivor Katz (Australia)
14:30 – 15:00	An overview of renal supportive care Frank Brennan (Australia)
15:00 – 15:30	Symptom management in patients with ESKD Frank Brennan (Australia)
15:30 – 15:45	Tea / Coffee Break – Senate II Foyer
	Session 3: Clinical Nephrology
	<i>Chairperson: Dr Vakhtang Rekhviashvili</i>
15:45 – 16:15	An update on treatment approaches for common glomerular diseases Ikechi Okpechi (SA)
16:15 – 16:45	Treatment of glomerulonephritis: The journey from cyclophosphamide to Rituximab Ikechi Okpechi (SA)
17:00 – 17:30	C3 Glomerulopathy, an update Matey Radev (SA)
17:30 – 18:00	Anaemia - Novel therapies Nina Diana (SA)

PROGRAMME - FRIDAY, 12 OCTOBER 2018

Tea / Coffee Break & Exhibition - Assembly I & II		
07:30 – 09:00	<p>Adult CME Day 2 Venue: Senate I and II</p> <p>Session: Renal Pathology</p> <p><i>Chairperson: Prof Ikechi Okpechi</i></p> <p>Transplant kidney biopsy cases - Clinical histology Dewald van der Walt (SA)</p> <p>The pathology of selected glomerular diseases Pulane Mosiane (SA)</p>
